# Biometrics and Identity Management

# Biometrics and Identity Management

- The Biometrics has highly specialized skills in the development, deployment, and service of high-quality biometric solutions including facial, fingerprint and DNA recognition technologies. The offered solutions are capable of solving the most difficult identification challenges, adding certainty and surety to law enforcement, security, and commercial applications.
- BIM Unit has deep expertise in handheld, mobile, and fixed fingerprint, iris, and biometric technologies, and also offers a class-leading 3D facial recognition system. The Biometrics develops and implements multimodal biometric systems that use multiple sensors or biometric technologies to overcome the limitations of unimodal biometric systems. The Biometrics has the capability to integrate biometric technologies with access control systems in many forms.

# Biometrics and Identity Management

- تمتع السمات الحيوية بمهارات متخصصة جدا في تطوير وتنفيذ خدمات السمات الحيوية عالية الجودة بما فيها تقنيات التعرف على الوجه و بصمات اليد إضافة إلى تقنيات التعرف على الحمض النووي. تساعد خدمات الوحدة المقدمة على مواجهة وحل تحديات عمليات التعرف على الهوية بإضافة مصداقية وأمان أكبر للتطبيقات الأمنية و القانونية و التجارية. لدى فريقنا خبرات واسعة في تقنيات السمات الحيوية و الآيريس و بصمات الأصابع و تقنيات العرف على الوجه ثلاثية الأبعاد حيث نسعى لتطوير و تشغيل أنظمة السمات الحيوية ذات أجهزة استشعار متعددة لتجاوز قيود أنظمة السمات الحيوية أحادية الاستشعار. وتسعى الوحدة تماشياً مع حاجة السوق الملحة لدمج تقنيات السمات الحيوية مع أنظمة مراقبة الدخول في مختلف المجالات.

# Biometrics and Identity Management

- Biometrics core business lines cover the following:

Identity management.

Access Control and Surveillance

# Biometrics and Identity Management

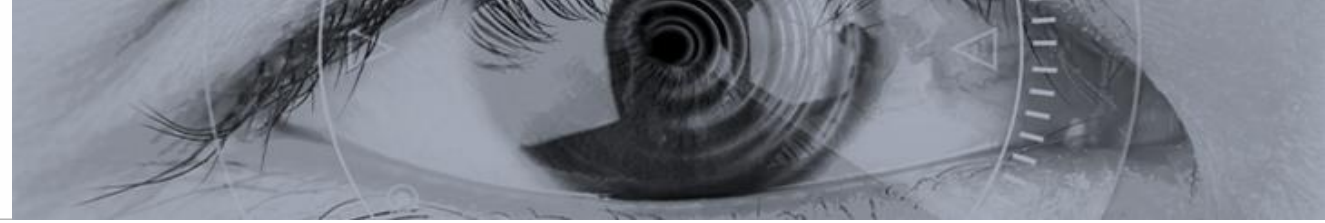

Finger print with password and card and face recognition , touch less solution

## • UVTS Solution

An Authorization (U-Drive or Permanent) is issued for a user with certain rules.

User Can request a Car.

If the requested car meets the rules of the authorization it will be assigned to him.

User can check out the car and use it then check it into the garage again.

At check -in if the usage violates any of the authorization rules, system generates a violation.

# Communication and Information services

# Communication and Information services

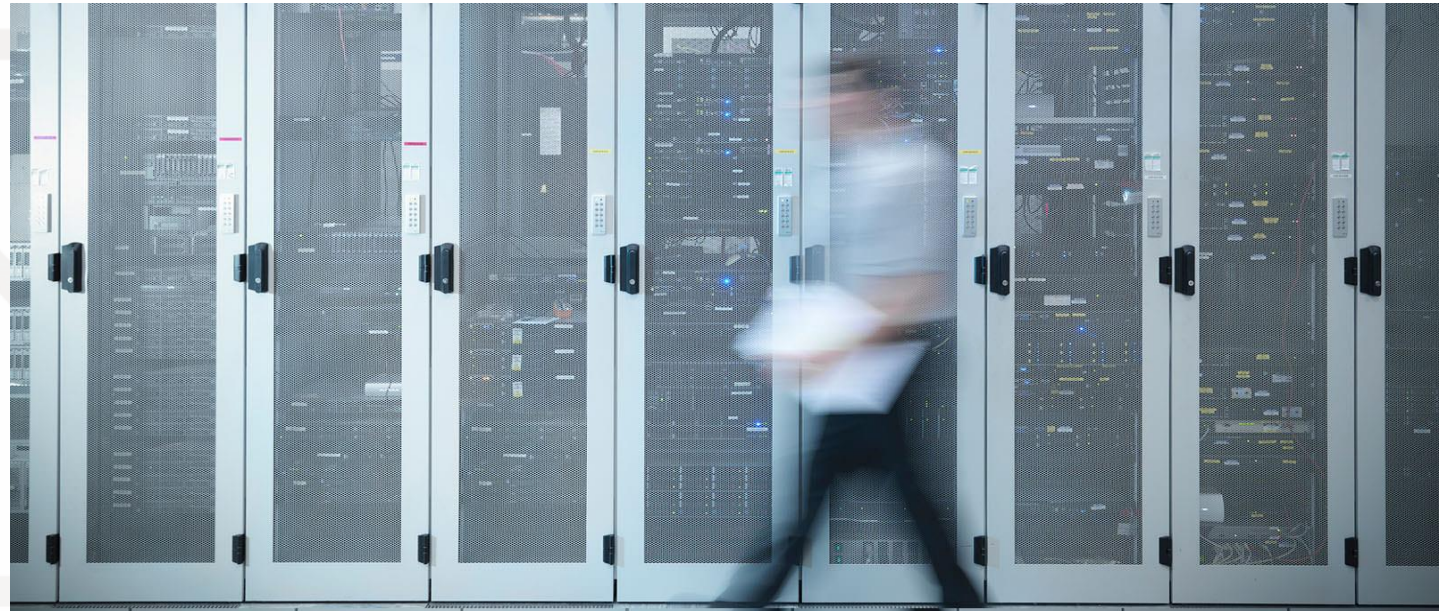

- **About Communication and Information System:**
- The Communications and Information System enjoys expertise and complete capability to cover all core communication and IT solutions technologies.
- The Communications and Information Services Unit is a solution provider and system integrator Unit. CIS specializes in bringing together component subsystems into a whole and ensuring that those subsystems function together. We work with multiple vendors such as Cisco, HP, Dell, Oracle, SAP, and Microsoft to offer turnkey solutions best suited to the clients and meet their expectations

# Communication and Information System

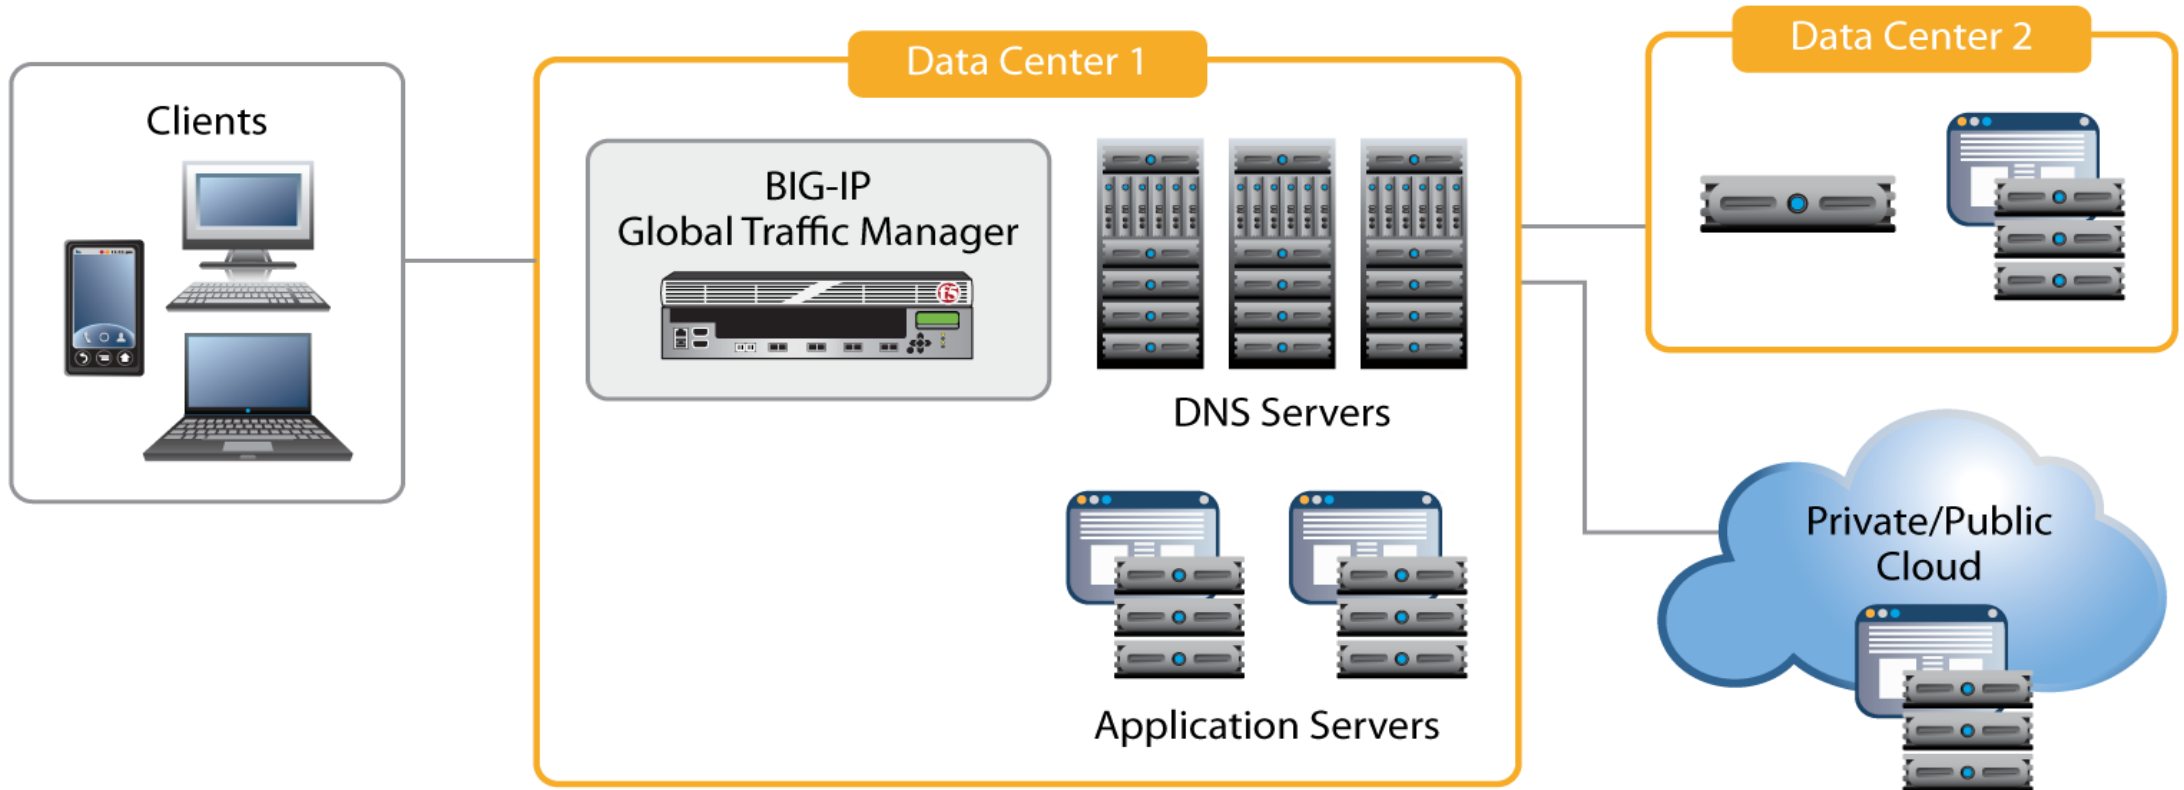

## • About Communication and Information System:

- Infrastructure data center
- Nodes
- Civil work
- Wireless solution
- IP telephone
- Supply and installation
- Passive and active companies.
- IT Support and maintenance

# Communication and Information System

- CIS core business lines cover the following:

Communication Services.

E-Services

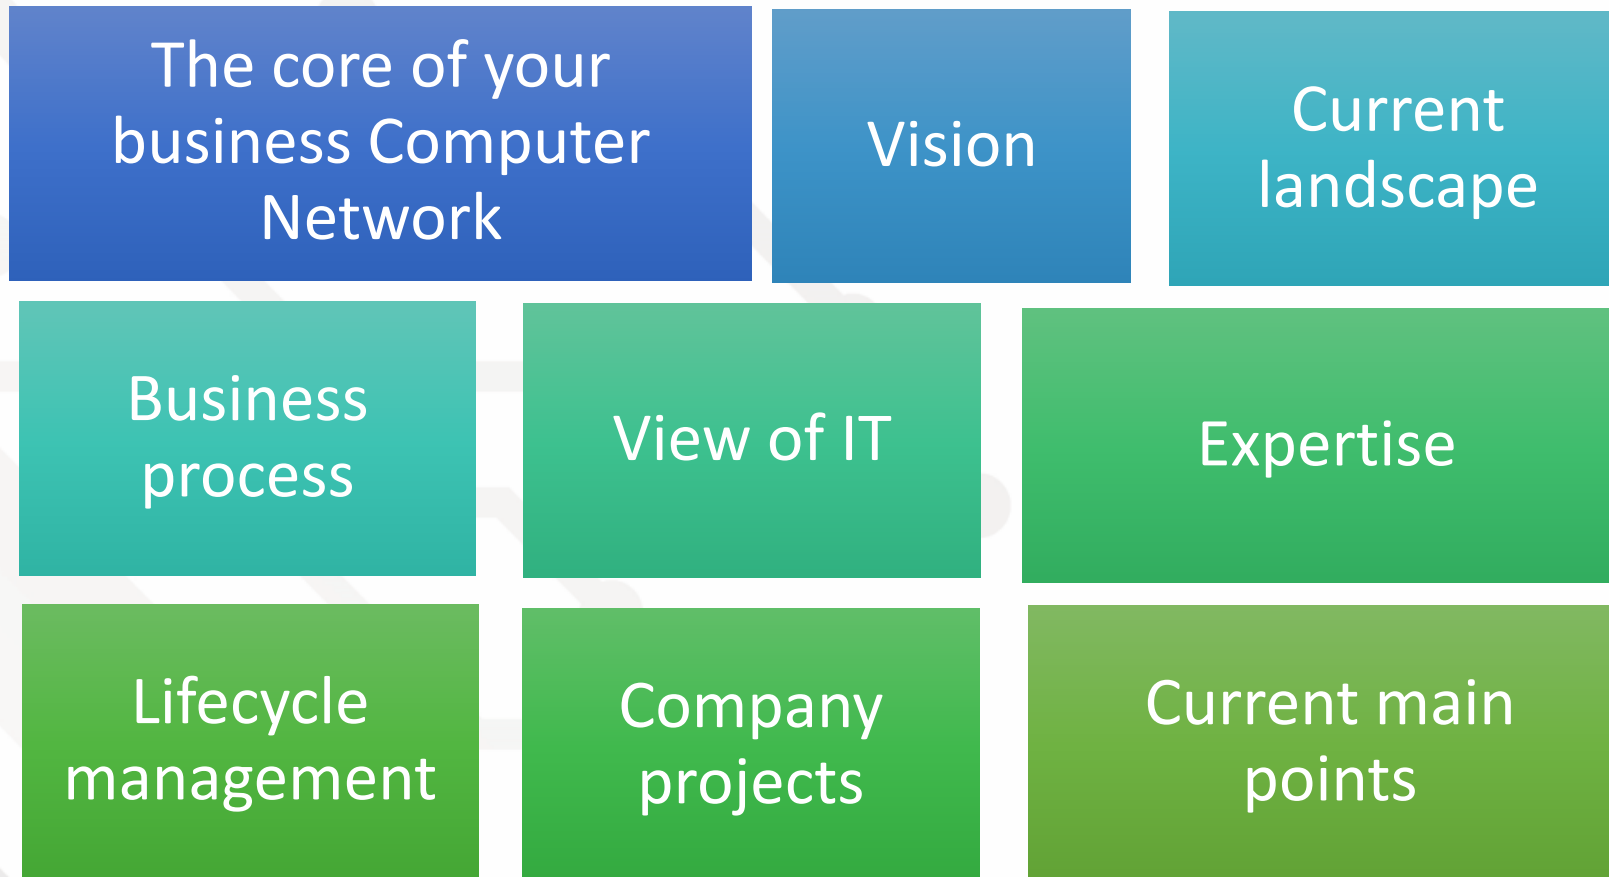

IT Support Services

# Networking and Consultant Services

- When it comes to your business, computer networking must be handled by trained and certified professionals. We assess your network setup, network security, backup systems, servers, workstations, software, hardware, LAN/WAN Solutions, Fiber Optics Solutions and notify you if your system needs network upgrading, computer service, or any other network improvements.

During Evaluation and Services, we will discuss the following critical points:

# Network Installation & Design Services

- Network Setup and Design Services Include:

## On-site Evaluation and Proposal Delivery

- A certified network consultant will examine your current network environment and discuss your technology requirements to create a strategy that best fits your needs and budget.

## Choosing Products and Component

- With the best-quality components at the best prices, you can be sure that your network will be robust enough to cope with even the most demanding business environment.

## On-site Installation and Network Consulting Services

- We will agree on the specifics for each service in a signed project plan prior to the commencement of any work.

## Hardware Delivery & Installation

- All hardware will be delivered, unboxed and set up in the locations agreed upon in the project plan.

# Network Installation & Design Services

- Network Setup and Design Services Include:

## Hardware Configuration and Testing

- All hardware will be tested and configured to the manufacturers specification in preparation for software installation.

## Software Delivery, Installation and Testing

- All specified software will be delivered, then installed and tested as specified by the publisher/manufacturer.

## Cable Installation

- Cabling will be installed in a tidy and appropriate manner in locations specified in the project.

# Network Installation & Design Services

- Network Setup and Design Services Include:

## Proactive Maintenance and Support Plans

- We provide ongoing help desk support and proactive network maintenance which will allow your company to focus on your business objectives by providing relief from the challenges of day-to-day IT functions. From server maintenance to end-user support, we handle all of your technology needs.

## Pricing, Quotations and Rates

- Every network is different and we will always work to create a solution within your budget.

# Knowledge Management services

- **About Knowledge Management services:**
  - Knowledge Management has the full capability and competency to provide data extracting and data mining solutions to empower both the governmental and private sectors and enable them to compete in knowledge and data management discovery related to the work activities in support of decision-making process.
